Education

Indian Institute of Information Technology, Sonepat — Sonepat, Haryana
B.Tech in Information Technology (CGPA: 9.29) — *Aug 2023 – May 2027*

St. Joseph's College (ICSE) — Prayagraj, Uttar Pradesh
Class 12 – 95.25% — *Mar 2021 – Feb 2022*

Technical Skills

Programming Languages: Java, Python, C/C++, JavaScript, TypeScript, SQL
Networking and Security: TCP/IP, DNS, DHCP, Routing & Switching, Network Security, VPNs, TLS/SSL
Libraries and Databases: NumPy, Pandas, Matplotlib, MongoDB, PostgreSQL
Technologies and Frameworks: React.js, Next.js, Node.js, Express.js, Redux, AWS, CI/CD, Docker
Core Concepts: Operating Systems, Computer Networks, Cisco Packet Tracer

Experience

NeoCortex AI — Software Engineering Intern — Remote
May 2026 – Present

- Developed **SYNQ**, a Chrome extension enabling persistent AI memory across ChatGPT, Claude, and Gemini by implementing semantic vector search, knowledge graph extraction, and context retrieval across 3 AI platforms.
- Architected a full-stack platform using **React, TypeScript, Node.js, and MongoDB**, building scalable APIs for chat archival, contextual retrieval, project management, semantic knowledge discovery, and analytics.
- Built **Serp-AI**, an AI-powered SEO extension delivering competitor insights, content gap analysis, and ranking recommendations across 8+ SEO automation features using React, Firebase, and LLM-driven workflows.

Enalo Technologies — Backend Intern — Remote
Sep 2025 – Oct 2025

- Implemented a secure GitHub OAuth 2.0 authentication system with encrypted token storage, session validation and secure API access management, collaborating with engineers to achieve a 99.9% login success rate.
- Integrated GitHub REST APIs for repository access, webhooks, and runner registration, coordinating with DevOps teams to define workflows and documenting CI/CD processes, reducing manual setup time by 40%.
- Built a scalable serverless backend using AWS Lambda, Express.js, and PostgreSQL, coordinating with frontend developers and optimizing database queries to improve response time by 35% under load.

Projects

ChatSphere | *MongoDB, Express.js, React.js, Node.js, Socket.io, WebRTC, JWT* — Dec 2025 – Jan 2026

- Developed a real-time full-stack chat platform using Node.js, Express.js, React.js, Socket.io, MongoDB, and JWT, designing 4 REST APIs and enabling persistent WebSocket-based messaging with secure authentication.
- Designed and implemented a responsive React.js frontend with Vite and Tailwind CSS, creating 12+ reusable components and integrating WebRTC-based audio/video calling with custom signaling and state synchronization.

ClassMate | *React.js, Node.js, Express.js, PostgreSQL, Redux, Vite, Docker* — May 2025 – Jun 2025

- Engineered a full-stack college productivity platform with 6 integrated modules, incorporating student feedback to streamline attendance, ride-sharing, marketplace, skill exchange, notifications, and administrative workflows.
- Created 35+ RESTful APIs using Express.js and PostgreSQL, analyzing query execution patterns to identify and eliminate N+1 issues, reduce payload size, and improve backend performance and scalability.

Equity Nest | *Next.js, TypeScript, Redux, Node.js, Google OAuth, Upstox API* — Jan 2025 – Mar 2025

- Spearheaded development of a full-stack stock trading platform using the Upstox API, processing real-time data for 66,000+ financial instruments with portfolio tracking and interactive TradingView visualization.
- Designed and integrated a low-latency streaming pipeline using WebSockets, Socket.io, and Protocol Buffers, enabling real-time market data delivery while supporting secure, scalable user sessions via OAuth 2.0 and JWT.

Achievements & Certifications

- Solved 550+ problems on LeetCode (Rating: 2000+, Top 3%) and CodeChef 3* (Rating: 1700+).
- Google Cloud Computing Foundations – Covered core GCP services including compute, storage and fundamentals.
- Led a team to finalist finishes at Technicia'25, HackChrono and ComSoc hackathons.
- Stanford University – Divide and Conquer, Sorting and Searching and Randomized Algorithms.
